

ATL Webcast: Automating Cannabis Testing with LIMS

publication date: Nov 13, 2018 | author/source: Accelerated Technology Laboratories Inc

[Previous](#) | [Next](#)

Accelerated Technology Laboratories, Inc., a leader in Laboratory Information Management Systems (LIMS), continues the 2018 LIMS Webcast series on Wednesday, November 14th with Automating Cannabis Testing with LIMS.

This webcast will provide valuable guidance for organizations looking to select and implement a LIMS to help manage their cannabis testing operations.

Webcast Overview

With the legalization of cannabis for both medical and recreational uses within several states in the US, and recently in Canada, the need for analytical testing laboratories has grown significantly. These laboratories play a critical role in ensuring that the product that is released is of high quality and free of contamination. Unlike environmental analytical testing laboratories, cannabis laboratories face unique challenges in that they are required by law to manage product on hand, product disposal, testing results, and reporting to state agencies. This webcast will focus on the key factors involved in selecting the right LIMS for this emerging industry.

Topics Covered During the Webcast

- Data Management: The Unique Requirements for a Cannabis Testing Laboratory
 - Key Advantages of LIMS for the Cannabis Industry – Features and Functionality
 - Features in the LIMS that facilitate Regulatory Compliance
 - METRC: What is It and How Can a LIMS Ensure METRC Compliance?
 - Cloud vs. Premise-based LIMS: What is the Right Choice for My Lab?
-

Who Should Attend

Recommended attendees include laboratory directors and managers, owners, and quality managers in the cannabis, agriculture and farming sectors. Also, investment and venture capital professionals looking at investing in the cannabis industry.

Wednesday, November 14, 2018

1:00 - 1:30PM US Eastern Time

12:00 - 12:30PM US Central Time

11:00 - 11:30AM US Mountain Time

10:00 - 10:30AM US Pacific Time
